DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because the length of the abstract exceeds 150 words. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Okazaki (US 2001/0018143). The Okazaki reference teaches a component of a fuel cell comprising a pair of separator plates "1A" & "1C" which are arranged in parallel to each other in a state of having a gap between contact surfaces thereof opposing to each other and a gasket "7a" arranged in a gasket groove "8" that is provided in both of the separator plates and adhered to both separator plates (See Figure 1). The gasket "7a" that is shown in Figure 1 is a rubber gasket that is compressed within the gasket groove in order to form the seal between the two separator plates "1A" & "1C".
